Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Portland, OR 97229

Comcast is my cable and modem provider. I am furious that they would collect their high monthly fees, then block my communications. Aside from personal use, the majority of the use is for our home-based small business. We cannot afford to pay the excessive fees they will put on top of their already high fees to be able to run our online business. The FCC must stop this greedy behavior! Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. It is your job to represent us not kow-tow to them.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

We, the members of our family, as well as our web-savvy neighbors and friends urge you to take a clear and unwaverable stand FOR total net neutrality. Freedom in a democracy is only as real as the freedoms it's citizens can exercise... there is nothing hypothetical about it. We are AGAINST censorship and differential net services, and we're AGAINST any group private or government setting up filters or censorship in the net. This is not just a personal choice, but is also good economic sense. If America becomes too closed minded and implements net NON-neutrality, we could experience a huge brain drain as all superintelligent people will be tempted to leave the US. Thanks for your time.

I write about an issue of utmost importance to all Americans - the preservation of Net Neutrality on the Internet. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take immediate firm action to put a permanent and abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We cannot allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

In most areas of the country where I have lived, Comcast has a monopoly on high-speed internet access. While I do not use peer-to-peer networks, I do develop content for the web which often means uploading and downloading large files, including informational catalogs, image files, and other basic content used to develop new web sites and provide information to our users and the public. Comcast advertises high-speed connections but chokes the delivery speed for large files which can take hours to upload while people with other providers can upload them in minutes. It is a shame that in this great country, a worker cannot access the adequate tools to do their job because the necessary protections are being rejected. Comcast's blatant and deceptive choking of internet communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Portland, OR 97214

I am a Comcast customer in Portland, Oregon. Comcast still has a monopoly on high speed internet service in my area. I experience degradation of service from Comcast trying to prevent me from using services they consider competitors to their content business every blinking day. An example is what they do to Youtube. For instance, Barak Obama's speeches come through with horrible stops and starts every 1/2 second or so. It is impossible to appreciate the speech with that kind of blocking. We have to have an open internet, or all we have is another set of TV channels, not an open communications system. ----- Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. 2441 University St
Eugene, OR 97403

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Deceptive blocking of peer-to-peer communications by Comcast is the problem many of us believed was bound to occur without Net Neutrality protections. Now that it has happened we are no longer selling tickets to a wolf show that had no wolf. The FCC should take immediate action to put an end to this practice and to prevent other Internet service providers from doing the same.

Michael Corrigan

PO Box 15002
Portland, OR 97293

Please recognize that allowing the telecommunications industry to discriminate between types of internet traffic amounts to privatizing the internet. We must not allow this to happen. Imagine all the roads in the U.S. were private, and those companies wanted to charge different tolls to anyone they wanted, with only the most vague assurances that they would not abuse their power. Now imagine this was true for all transportation, all communication, and all commerce of any kind. How long before the companies involved would abuse their power? The internet works as well as it does because so far, the system doesn't care what travels on it. It was neutral by default. Technology is changing that. I don't fear any technology, but I am greatly concerned about what the companies and people employing discriminating processes will do to the internet. Since the potential for abuse is so ripe, we can't rely on compensatory damages after the fact. The principal of neutrality is clearly set forth in our Constitution in the form of the interstate commerce clause. Analogous laws cover discrimination in employment and housing and access to public and private institutions. Don't let the internet become a system of public control. Let it remain a system of public involvement. Thank You, Michael Corrigan

Sandra Crossler
4453 Calumet Way
Eugene, OR 97404

It's a slippery slope from managing high-bandwidth content to blocking content that competes with Comcast. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. There is no gray area here whatsoever. Either the Internet is free and open to all or the FCC will give the gatekeeper ISPs permission to ask for bribes in exchange for access.

Sandra Crossler
4453 Calumet Way
Eugene, OR 97404

Comcast's corporate behaviour is totally unacceptable. Not only do they get caught red-handed blocking content going to their own subscribers, now they got caught on YouTube (<http://www.youtube.com/watch?v=RYGtNmmb2y0>) paying people to take up seats at your Monday, February 25th, hearing in order to prevent individuals who wanted to speak out against Comcast's activities from entering the meeting room. Since cable companies are content providers, there is no difference whatsoever between managing content and blocking a competitor's online content. If you do not act quickly to preserve Net Neutrality, your inaction gives large telephone and cable companies tacit permission to block internet content.

The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Comcast has absolutely no right to regulate or monitor bittorrent, i don't use it but just because i don't doesn't mean other people don't. I understand they have a duty to keep their networks fast, but maybe this is what every company has to do....expand! Research and development. bittorrent is very popular, but just because it inconveniences comcast, doesn't mean they should inconvenience PAYING customers. Cable companies raise prices ALL THE TIME, they are known for that...just like taxes, the price just keeps going up. So along with that price going up, maybe our service should also, NOT go down or be taken away. Keep everything neutral!!!

We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. It may be that in the climate that we live in now such ideas are nearly acceptable, but there is good reason to take a strong stance on net neutrality. In the future, it may be possible for political opponents to eliminate competition by making access to a site through a particular provider nigh unavailable. This and many other ideas surrounding the concept require the FCC to take action now.

What it says up above, in spades! Comcast's slimey techniques to keep the really interested public out of the Harvard meeting is no more than I'd expect of a big corporation. "Comcast was PAYING PEOPLE TO FILL UP SEATS AND CHEER FOR THEM. Tons of folks, including reporters, got turned away."
<http://www.savetheinternet.com/blog/2008/02/25/comcast-blocking-first-the-internet-now-the-public/> We've been getting snail-mail spammed for months, if not years, with their (Comcast) advertising, trying to get us to help them get an effective monopoly on internet access in our town. We ignore it, because MONOPOLIES ARE NOT GOOD FOR BUSINESS. And if you think a handful of giant corporations would make it "not a monopoly"... The Internet is free now. It should stay free and unbiased! Thanks.

The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. It is also common knowledge that while Comcast offers 'unlimited' usage, there are hidden limits that once attained, will lower your speed, allowing them to provide less than you pay for, per their advertising. Not all heavy downloaders use peer-to-peer communications, many of us are just downloading things we pay for... this is very unfair. In my case I am a gamer (a Sims 2 player), and we have lots of custom content for the game that we pay for and *must* download, there is no other way to get it - once I reach my hidden Comcast limit, my internet goes down to dial-up speed or lower... while I'm paying for 6Mbps, unlimited. Why is this allowed?

Bill Eagle

The FCC needs to take a front seat in all these battles, from internet take over to public broadcasting TV stations. Don't cave in like the USPS, who have misrepresented the American public for big business... Time/Warner? Lets finally take a stand and protect all US airwaves. Have you actually watched TV recently? Oh, and maybe with your children. YOU ARE THE POLICE DOGS. We are counting on you to clean up the internet and TV. The industries can not be trusted to be watch dogs as they have a profit to gain or lose. May God give you the wisdom to do the right thing. Sincerely, A True Blue American Citizen Michael J. Faber Please confirm receipt of this ASAP. Thank you

Comcast is my cable company and when I heard about this, I wrote to them. They denied that they were doing anything "untoward", even though they clearly were. Because of this, when it came time to make a decision on my internet I refused their offers and "deals". I still refuse to use them. MY internet company REFUSED Bush's violation of my privacy and DIDN'T limit it's users ability to use certain sites, so THEY got my business instead. This is just ONE company who has benefited from Comcast's antics. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Comcast's attitude toward Net Neutrality is abominable, but I think Comcast has made it abundantly clear that they hold only the utmost contempt for their customers. A long time ago, they offered unlimited access to the internet at blazing "broadband" (which appears to be market-speak for "not dialup," which is in itself another issue), with "unlimited" connectivity. The problem is that they were secretly tracking people who used too much of this "unlimited" bandwidth and terminating their accounts. As I recall, they largely got away with this practice, because in the end, they simply modified their Terms of Service to include a clause which really means "oh, and by the way, if you actually use the unlimited connection as an unlimited connection, we reserve the right to terminate your account. It's for the good of our other customers," which I understand is called overselling. Where I come from, if you advertise a product, you have to deliver the product on payment. Well, they're at it again. This time, they're not claiming the right to terminate the accounts with too much activity -- they are simply refusing to deliver the product they advertised, throttling some types of traffic down lower and forging packets to secretly disconnect open connections. Now I learn that there was a hearing to discuss Net Neutrality in Boston yesterday (Feb 25), which was paid off by Comcast -- Rather than allow interested people, seats were filled by people paid to prevent them from being used otherwise. This is outrageous. I hope and trust that you, the FCC will stand up to this ignominy. As an unwilling Comcast customer (the next fastest service available for me is Qwest DSL, which would cost me 30% more, and be 70% slower), I realise that if Comcast is permitted to do this, the effects will be devastating across the board. If this is permitted, other Internet Service Providers will do exactly the same thing, degrading the usefulness of their services as well. I, as a consumer would have no recourse. Thank you for reading this.

Jared Graham
4676 Commercial St. SE
Salem, OR 97302

Preserving the free flow of information is, in essence, helping preserve democracy. Sure, there is a lot on the internet that is trivial, or seemingly unimportant. Yet, within all the white noise of recreational and social use of the internet lies the ability of everyone to have a voice in government, to stand up to injustice, whether it be a large corporation not fulfilling its obligation to its customers, or calling for aide to a good cause. Internet activism has caused laws to be changed, corporations to do the right thing, and raise millions of dollars for good causes. All of this because of the free flow of information and communication the internet allows. Censorship, which is what will happen if net neutrality is not maintained, starts with what some might consider unimportant communication, but blocking of any communication is the first step to narrowing the internet gate to allow only those ideas the corporate leaders want to be heard. That, to a very large extent, already happens in news broadcasting. Let it not expand corporate control of information to one of the most important bastions of communication and debate. We must preserve net neutrality at all cost. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections.

The airwaves belong to the people. . . .and no one that I know of wants to have some internet company blocking information, which I understand Comcast has done -- along with Yahoo. We need Net Neutrality protections! And, you, as our representatives must protect the public -- not the industry! As an American citizen I decry the influence of "big business" to over-ride public interests -- especially when the FCC was set up to prevent this very thing. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Comcast is also paying "seat fillers" to take up the public's seats at hearings related to web neutrality. Not only do these bloated corporatists think they control the internet, they think they can control (by blocking) the voice of the people. Just like the farmers versus wolves in Montana, the friends of Bush and Cheney are rushing to close unfinished business before a less accomodating Congress and executive takes office. Don't let them buy you, sway you, browbeat you, bribe you or extort you to vote their way. We need to maintain freedom of access to the internet for all, and not let well-placed corporations seize the portals that serve us all and start charging a toll!

Scot Hale

We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. It is time that all cable companies come under the control of the FCC. That MSNBC insulted the Democratic candidate Dennis Kucinich by not honoring his contract threatens the peoples right to know. It is time for new regulations reining in corporate media. They must serve the people not the profits of their ownership....GE for example.

Kathleen Hall

Milwaukie, OR 97267

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast Censoring Your GI Special Comcast is repeatedly refusing to send GI Special from the GI Special home email address to you and other people with Comcast email addresses who have asked to receive the publication, which is nothing more nor less than censorship. That is why you're receiving this GI Special from a different email address. This is the Comcast message, which claims your email address is no good. "A message that you sent could not be delivered to one or more of its recipients . This is a permanent error. The following address(es) failed: [your address is inserted here] retry time not reached for any host after a long failure period" We have been in touch with some Comcast subscribers individually to check, and have confirmed this is lying bullshit put out by Comcast. The addresses do not "fail." If you have an alternative email address, please send. Given that Comcast has chosen to decide what reading is good for you, and what is not, it would be intelligent to have nothing further to do with them, and get a different email address. You have no way to know what other emails to you Comcast is censoring, because they don't tell you. You might also wish to call and tell Comcast what you think of their deciding what mail you will or will not receive, behind your back. Solidarity, T GI Special Comcast Subscribers blocked tdepastino@comcast.net retry time not reached for any host after a long failure period frankscott@comcast.net retry time not reached for any host after a long failure period bayanko21@comcast.net retry time not reached for any host after a long failure period goshomg@comcast.net retry time not reached for any host after a long failure period kaymsw2b@comcast.net retry time not reached for any host after a long failure period libby.frank@comcast.net retry time not reached for any host after a long failure period andrewsapp@comcast.net retry time not reached for any host after a long failure period mjward1@comcast.net retry time not reached for any host after a long failure period 5moons@comcast.net retry time not reached for any host after a long failure period OaklandISO@comcast.net retry time not reached for any host after a long failure period wefwins@comcast.net retry time not reached for any host after a long failure period abureem@comcast.net retry time not reached for any host after a long failure period toddchretien@comcast.net retry time not reached for any host after a long failure period lcwolf03@comcast.net retry time not reached for any host after a long failure period w.standley@comcast.net retry time not reached for any host after a long failure period No virus found in this incoming message. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. In fact i think that Comcast should be fined heavily for busing in people on the FCC hearings. Giant corporations do activities like this and get away with it because the FCC will not fine them and make an example out of them. Giant corporations have proven time and time again that unless held accountable they will escalate situations like this. They will do worse as they want things there way. I say Americans demand Net Neutrality versus the giant corporations having control of it.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Aerayelle Kelsheimer

Portland, OR 97217

The internet is a historical miracle that advances our society in ways never before possible. It allows anyone to voice their opinions openly and without political and social repercussions. The internet is the essence of raw humanity in that way. Don't let it become commercialized like everything else in this artificial world. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Portland, OR 97202

By now you're aware of Comcast's disrespectful actions on your turf Monday, paying seat-fillers to fill the room and keep citizens with legitimate input outside. If they're willing to pull dirty tricks like these in public -- in YOUR house -- imagine what they think they can get (and are already getting) away with in cyberspace if the doctrine of Net Neutrality disappears. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Please read my personal comments as well as those directly below, which cannot be stated and heard enough. -----
----- Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. ----- It's hard to say it any plainer than the above boilerplate but I'll try. What Comcast is doing is in direct violation of the spirit of the First Amendment. The FCC needs to immediately and strongly state that this kind of thing is contrary to the purpose of the FCC. Just Do It. Thank You

The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I fully support having Net Neutrality and want Comcast as well as other big business blocked from taking over the internet.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. America's free speech depends in part on the Internet. The Internet should never be interfered with. The FCC can, and should, take immediate steps to prevent Comcast or any other entity from stifling freedom.

Comcasts blocking of and shaping internet traffic is in direct violation of their service agreements with individuals. we are told we have a particular bandwidth but when I attempt to down load, viewing the performances of my network connection very clearly indicates an artificial limit well below the advertised bandwidth. this is not the signature of varying bandwidth based on the total traffic at the time but a clear and level signal of bandwidth limiting, also know as packet shaping. This is best demonstrated by accessing content at comcast and then another provider such as youtube or vuse. The comcast content flows freely while other content does not. again, not because of a lack of capacity causing a random fluctuation of the connection speed but a consistent, level cap on the download speed. Make them stop this practice and give their customers what they are told they would get and are paying for.

The need for bandwidth will only increase in time. Allowing Comcast and others to shortchange their customers now will have negative effects in the future. Instead of investing in lawsuits so that they don't have to supply the services they promised and we paid for, they should be investing in new technologies that will increase bandwidth- not stifle it. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Portland, OR 97215

I am deeply disturbed by Comcast's use of "hacking" technology to interrupt peer to peer communication. Comcast's blocking of Torrent technology - which, coincidentally, competes with their own video offerings - is clearly anti-competitive and anti-innovation. The FCC should use it's influence as a regulating body to stop Comcast from deploying technologies that hamper communication and connectivity between individuals. Innovation creates wealth for all Americans, big and small. I would hope that the FCC would recognize this and use it's influence to prevent Comcast from making us all poorer.

Nancy McDonald

West Linn, OR 97068

Knowing that my own service provider, Comcast, has been blocking communications with tools on the order of the filtering that happens in China shocked and horrified me and were a wake-up call that Net Neutrality is essential to our free democracy. This is a request for the FCC to take immediate action to stop Comcast and any other ISP's from standing in the way of the free flow of ideas and information on the internet. Corporations have no right to limit us from knowledge and news, and the fact that they are trying to do so is a very frightening fact. We need our governmental agencies to step in and protect the rights of the American people. Thank you for taking our comments seriously.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

I know your concerns are different than the avg human being, you live in a different world, this charade, the mockery of justice, controlled by people with money as power. and the ease in which one finds him/herself playing this game is like apples on a tree (theres alot of possibility). im asking you too look above money and power and your desire for this and material consumption. im asking you to look at what makes us happy in life, what will make us truly, eternally happy. im asking you to look at humanity, how so many simple things could be done to solve the worlds problems. such a technologically advance civilization still doesnt cant feed everyone. this is a choice, the direction you want your life and consequently the lives of everyone on this planet to take. i would like to live in world without wars and bloodshed, where everyone has the basic things they need to survive no matter what, where corporations or elite groups of human beings dont control and squeeze the rest of us. where we live together, as human beings, as creationers on this planet in harmony. Please keep the internet free, without restrictions and protect its sovereignty. for the betterment of the planet earth, for the future generations: for your childrens children. : Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. The fact that this action was taken SECRETLY should be ample proof that corporations have both the ability and the will to violate internet integrity and personal choice. This administration has covered up for corporation misconduct repeatedly and our ability to trust is severely damaged. It is hell not to be able to trust your government.

15280 N.W. Oak Hills Drive
Beaverton, OR 97006

My wife and I are a Comcast customer, obtaining our Internet, telephone and cable telephone service from that company. Free, unimpeded use of the Internet is an extraordinarily important form of free speech in our society and vitally needed if we are to protect and preserve a democratic form of government. I am requesting the FCC to investigate, and stop, any corporation's attempts (including but not limited to those of Comcast), whether or not successful, to monitor or in any fashion hinder the free flow of communication engaged in by American citizens through use of the Internet. Thank you.

Eugene, OR 97408

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's practice of secretly blocking and inspecting peer-to-peer communications is shocking. The free flow of information is vital to the health of our democracy. The FCC must take serious and immediate action to preserve Net Neutrality and put an end to this harmful practice. At the same time other Internet service providers need to be informed that Comcast's behavior is wrong--all violators will be held accountable. The Internet is crucial to our economic growth and the rights of individuals to exercise free speech and participate in the civic process. The FCC must be firm in its resolve to protect it. We simply can't allow corporate gatekeepers to secretly interfere with Internet traffic. It is un-American and against what We the People believe about freedom in this great country we proudly call The United States of America.

It is time for Structural Separation of the access networks and Open Access to all service providers, thus providing a dynamic marketplace of choice and competition by price, performance, and service. Illegal behavior by monopolies go unpunished due to the complexity of doing so, if they were just one of a dozen service providers over a common network, they would be put out of business and brought up on criminal charges.

Portland, OR 97223

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I, Bradley Rasmussen, support the above statement. America was built on the principles of free speech and has since publicly supported unfettered equal opportunity for all citizens. I also believe that the Fourth Amendment of the Bill of Rights serves to protect "persons, houses, papers, and effects, against unreasonable searches and seizures". The reference to "papers" here indicates personal records and documents. However, these records and documents have been digitized, and I'm sure James Madison and the other delegates present in the signing of the Constitution would weep at the state of affairs in which we are so adamantly fighting to keep the rights to our own personal information and its protection; IP addresses, e-mail contact lists, phone records, and many others. Please stop.

The on-line monopolies are stifling the independence of the Internet in order to add another more income stream to their bottom lines. The playing field for Internet access is already moribund in the US. Other developed countries have far better 'net access and broadband available than here. The US is falling behind in this area and it is due to monopoly control of the means of connection. On top of this, the control of packet level communications will further stifle communication and trustworthiness of networks. The poaching of communications, the blocking and interference with my freedom of speech is precisely the issue behind Comcast's illegal actions. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. I'm just a kid here, so I'm no lawyer or anything, but even I know that the things Comcast is doing are wrong. It's scary to think that if they can block things like BitTorrent in the same fashion that the Chinese are censoring their internet, then they could potentially (bit of a slippery slope here, I know) strangle bandwidth away from sites they didn't agree with, effectively blackballing them for Comcast users.

Portland, OR 97217

In light of the fact that "news" coming through the media conglomerates routinely ignores real relevant news, the Internet has become the major source of information from both sides of the political spectrum. More and more people rely on the Internet for discussions of real day-to-day issues. Net Neutrality must be maintained and violations must be prosecuted. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Oregon City, OR 97045

Hi, Comcast is a good example of the one thing the monopoly laws were meant to prevent. This also means that Net Neutrality is threatened, after all if one company controls everything, then who can debate with them. Perhaps that is why Comcast was allowed to prosper, to allow the United States of America a brief glimpse of what Congress would prefer, which would be the Socialist State of America. I admit that at one point I was a Comcast user, but when I tried to switch to another carrier it took three months for them to shut off my service and start up with the other company. I have found out since that this was because I went with their opposition. I dislike the fact that we need a website dedicated to observing this type of activity, but I have an unrelenting hatred for the fact that this is allowed to happen, after all Adolph Hitler had a monopoly. So perhaps we should ask why we can't have one too? I shudder to think that some one out there thinks that we might deserve it, but I know some one probably will. There are always those who disagree, but when their views are silenced, well that is when Socialism wins. A wise man once said "Give me liberty or give me death.", some how Comcast did not get that message, or if they did then they ignored it. Farewell.

Paulette and Ron Tatum

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

For years, Congress has been claiming that it seeks to protect the Internet, and allow it to flourish without unnecessary regulation. The sole legitimate exception has been to limit Child Porn. Comcast, for its' own financial gain, seeks to bypass this protection by deciding for itself what Internet traffic is desirable, which programs are to succeed, which companies will flourish and which will fail. For example, Peer-to-peer software is a fair, highly effective alternative to many other software packages and internet technologies and has been targeted by Comcast for unfair treatment. The next step could very well include collusion with Microsoft, Adobe, or another manufacturer to make their Operating System run faster, their software package download quicker, their program respond more effectively. This effect will not be based upon the relative quality of the programs and technologies, but upon Comcast's or another company's unilateral dictate. This violates fair trade, the free market, fair competition, free speech, fundamental fairness and every other claimed goal of the American economic system. I strongly urge the FCC to make an example of Comcast, and send a

message to the nation's major corporations that they may not unfairly restrict the flow of information and technology is such a blatant way without fear of persecution.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Only four companies own the public broadcast networks. That includes television and radio. How are Americans to receive unbiased news when media giants--private corporations--own these networks? The answer is: It is impossible. So now there is an attempt being made to privately own the internet via Comcast. Of course. Everything is about money these days. What is really wrong with America? We have lost our values. We have lost our decency. Our honesty. Our fairness. Our traditions. (Did you know it was the Boy Scouts of America's 100 year anniversary last year?). We've lost our oneness. Our leaders are weak because they answer to money. Do you know why the great Roman civilization fell? For the very same reason we will: Gluttony. And here is just one more example of how money could completely wipe away the final strand that ties Americans together. Privatization of the Internet. Give private corporations an opportunity to own the internet and kiss freedom of speech, one of our most essential civil rights, goodbye. important civil rights. There won't be anything for you to do. Don't do it. You would be putting corporations before people. That IS NOT what our Constitution intended. My family landed in America before the Revolutionary war and fought England for our freedom. They helped establish this country. I am related to many people who have since fought for this nation on the ground and in public office. I truly pray that their hard work and conviction will not have been in vain. I am very concerned about comcast and other providers using their power to push their views on us by blocking access to sites and slowing down access to sites that dont meet their desires, financially and politically. With the tv being so dominated by such similar views we need the internet to support free thought and individual freedom that we are guaranteed under the constitution. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and

free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Portland, OR 97206

NO ISP can be allowed to decide what it will transmit under ANY circumstances whatsoever. Such matters MUST be left to the government acting LAWFULLY period!

Walter Wolanski
6321 SW 40th Avenue
Portland, OR 97221

I am writing to defend the concept of Net Neutrality. I am horrified that a corporation (Comcast) can blithely spoof packets to stop user connections on the Internet seemingly with impunity. I am particularly concerned that Comcast lied about this for months, and then tried to dodge this issue by falsely equating this practice with "network management". Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. The FCC is the only government group that is supposed to speak up for US citizens - please do not abandon this responsibility.
